LED Indicators

LED indicator	Status
Solid red	Charging
Flashes blue and red alternately	In Pairing mode
Flashes blue and red alternately	Disconnected from Bluetooth device
Flashes blue once every 3 seconds	Paired with a Bluetooth device

How to Use

1. Charging

1) Connect the charging port with any USB charging adapter or active computer USB port
2) Charging will start automatically with LED indicator turning red
3) The headphone is fully charged when LED indicator turns off

2. Pairing

1) Make sure the headphone and your BT device are next to each other (within 1m)
2) Press and hold the Multifunction button for 5 seconds to bring the headphone into pairing mode with the LED indicator flashing blue and red alternately
3) Activate BT function on your phone and search for the nearby BT connection
4) Find“RECONNECT REVERB” in the search results. Tap on the name to connect. Once connected, only the blue LED will flash once every 3 seconds

3.Wired Connect

Reconnect Reverb is not only a wireless headset, but also a wired headset. With the included cable, you can still enjoy music when the battery runs low.

Note:

• Please note the “L” and “R” markings on the headphone, they correspond to left side and right side respectively
• If a PIN code is required for pairing, please try “0000” (4 zero)
• The BT headphone can remember previous paired devices.
If you have previously paired the headphone with a device, simply turn on your device and the headphone (by pressing the Multifunction button for 2 seconds to turn on), they will connect the last connected device automatically without going into pairing mode.

Environmental Information

(Correct disposal of this product as per E-waste Management and Handling Rules)

This marking on the product,accessories or literature indicates that the product and its electronics accessories(e.g.charge, battery,cables, etc.) should not be disposed off with other household waste at the end of their working life.

Electronic equipment's contain many hazardous metallic contaminants such aslead,cadmium,and beryllium and brominated flame-retardants. Improper handling and/or improper recycling of the Electronic Waste results in these hazardous metals/substances getting released into our eco and biological system,thereby leading to various health hazards. So,to prevent possible harm to the environment or the human health from uncontrolled waste disposal,please separate these items from other type of waste and recycle them responsibly to promote the sustainable reuse of material resources.

Do's

- Always drop your used electronic products,batteries and accessories after end of their life in nearest authorized collection point/center or hand over to authorized recycler for disposal.
- Drop the discarded Electronics Equipment's only in the bins meant for the Electronic Waste.

Don'ts

- The product and its accessories are not meant for mixing into household waste stream or regular garbage bins .
- Do not dispose damaged or leaking Lithium ion(Li-ion) battery with normal household waste.

Information for improper disposal & handling

- Any disposal through unauthorized agencies/person will attractaction under Environmental(Protection) Act1986.
- If batteries are not properly disposed off,it can cause harm to human health or the environment.

For more information on safe disposal and recycling,please call on toll free number **18002006177 or** visit our website http://www.reliancedigital.in/ewastepolicy.html

This product is RoHS compliant RoHS
