RUNNER DUAL BASS EARPHONE SPORTS

USER MANUAL

Technical specification:

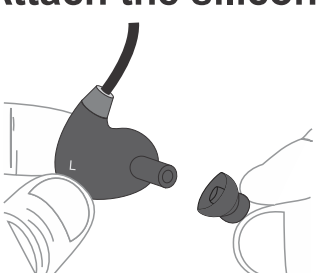
- Driver: Φ 9mm + 7mm
- Frequency: 20Hz-20kHz
- Sensitivity: 102dB ± 3dB
- Impedance: 10Ω
- Plug: 3.5mm (P2)
- Wire: 1.2 meter

Tips: Choose the correct size

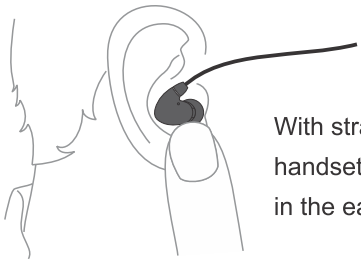
If your music is down or lacking bass, try different sizes of two Silicone plugs

4 sets of silicone earphones are included, make sure that you can get the best fit, comfort and sound.

Attach the silicone plugs.



Install the silicone into the headset wired as shown. Make sure that silicone is tightly installed prior to use.

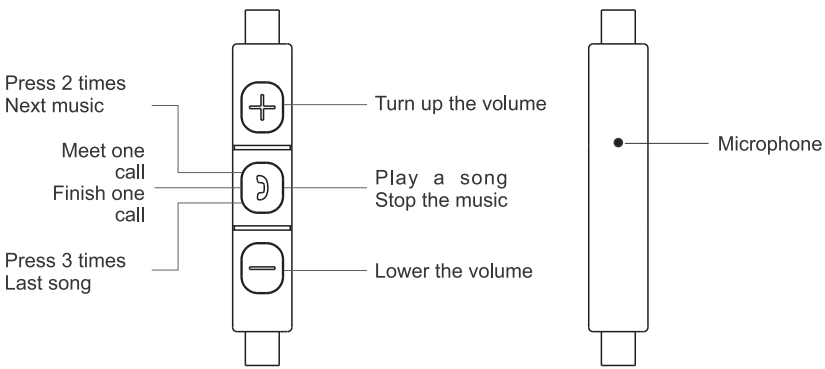


With straight adjustable rod, place the handset in the until it fits perfectly in the ear canal.

Fold the adjustable rod around of his ear.

The cable should be directed downwards. The fit should be comfortable and secure.

Microphone & Remote Control



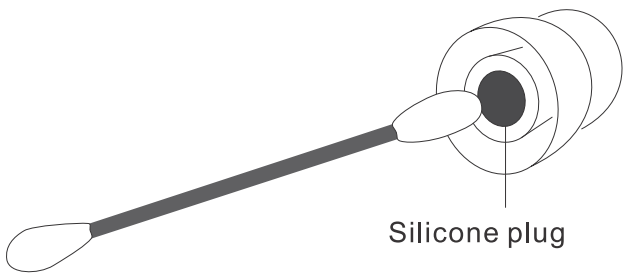
Removal and insertion during training:

If it is necessary to remove and reinsert theear while you exercise, dry your ears before insert again to prevent sweat on the silicone tip. O sweat will make the headphones slide out and this may cause a temporary reduction / loss of sound.

Maintenance and cleaning

- Do not remove the headset by pulling on the cable.
- Store and protect when not in use.

Clean regularly as below:



- Put a small amount of alcohol or peroxideof hydrogen in a cotton swab.
- Remove the silicone plugs from your headphones and push the swab in the center.
- Clean the outside of the silicone plugs.
- Brush the exterior of the silicone plugs.
- Wait for the headphones and silicone plugs toto dry completely
- Insert the silicone plugs into the headset.

Troubleshooting

- No sound / Poor sound: Check that the 3.5mm is fully inserted into the input smartphone or laptop. Check the volume setting in the media application.

- **The microphone is not working:** Press the call.
- **Weak basses check the silicone on the ear:** Try another size.
- **Highlighted pillows:** securely attach pillows to earphone port tubes.
- **Decreased sound quality**: Remove the silicone, check for clogging or dirt, and clean with a clean cloth.

Attention

Set the headset to an appropriate volume, the volume of the can damage your hearing. For your safety in the traffic, please do not use the headset while riding a bike, or riding a car.
